State total:	2,177,410	1,825,682	8,771,770	9,421,588	3,790,716	4,532

1/ These data are not strictly comparable with those in table 1, which are classified by counties according to location of bank.
 2/ Includes loans made in Wyoming by associations located in other States.
 3/ 1942 loans included are amounts approved rather than amounts outstanding.
 Includes drought relief loans.
 4/ County data represent rural rehabilitation loans to individuals not on projects, including those from State Corporation trust funds, and water facility loans.
 5/ Indicates number of borrowers rather than number of loans, as many borrowers have loans from both the Federal Land Bank and Land Bank Commissioner.
 6/ Represents rural rehabilitation loans to individuals on projects, including those from State Corporation trust funds. These are not distributable by counties.

^{1/} These data are not strictly comparable with those in table 1, which are classified by counties according to location of bank.

^{2/} Includes drought relief loans.

^{3/} County data represent rural rehabilitation loans to individuals not on projects, including those from State Corporation trust funds. They also include special real estate loans totaling \$973,005.

^{4/} Indicates number of borrowers rather than number of loans, as many borrowers have loans from both the Federal Land Bank and Land Bank Commissioner.

^{5/} Represents rural rehabilitation loans to individuals on projects, including those from State Corporation trust funds, and project equipment loans. These are not distributable by counties.

^{1/} These data are not strictly comparable with those in table 2, which are classified by counties according to location of borrower or security. Data for any county with less than three banks on July 1, 1942 are not shown separately but are included with those for the county named in parentheses. Asterisks indicate that data for additional counties are included, the number of asterisks representing the number of additional counties. County combinations are the same for both types of loans.

1/ These data are not strictly comparable with those in table 1, which are classified by counties according to location of bank.

2/ Includes loans made in West Virginia by associations located in other States, and excludes loans by associations in West Virginia which were made in other States.

3/ County data represent rural rehabilitation loans to individuals not on projects, including special real estate loans totaling \$5,985.

4/ Indicates number of borrowers rather than number of loans, as many borrowers have loans from both the Federal Land Bank and the Land Bank Commissioner.

5/ Represents rural rehabilitation loans to individuals on projects. These are not distributable by counties.

1/ These data are not strictly comparable with those in table 1, which are classified by counties according to location of bank.

2/ Includes loans made in Washington by associations located in other States, and excludes loans by associations in Washington which were made in other States.

3/ 1942 loans included are amounts approved rather than amounts outstanding. Includes drought-relief loans.

4/ County data represent rural rehabilitation loans to individuals not on projects including those from State Corporation trust funds, and water facility loans. They also include special real estate loans totaling \$12,907.

5/ Indicates number of borrowers rather than number of loans, as many borrowers have loans from both the Federal Land Bank and Land Bank Commissioner.

6/ Represents rural rehabilitation loans to individuals on projects, including those from State Corporation trust funds. These are not distributable by counties..

1/ These data are not strictly comparable with those in table 2, which are classified by counties according to location of borrower or security. Data for any county with less than three banks on July 1, 1942 are not shown separately but are included with those for the county named in parentheses. Asterisks indicate that data for additional counties are included, the number of asterisks representing the number of additional counties. County combinations are the same for both types of loans.

2/ Includes banks in the City of Alexandria.

3/ No insured commercial banks located in the county.

^{1/} These data are not strictly comparable with those in table 1, which are classified by counties according to location of bank.

^{2/} Includes loans made in Virginia by associations located in other States.

^{3/} 1942 loans included are amounts approved rather than amounts outstanding.

^{4/} County data represent rural rehabilitation loans to individuals not on projects.

^{5/} Indicates number of borrowers rather than number of loans, as many borrowers have loans from both the Federal Land Bank and Land Bank Commissioner.

^{6/} Represents rural rehabilitation loans to individuals on projects. These are not distributable by counties.

1/ These data are not strictly comparable with those in table 1, which are classified by counties according to location of banks.

2/ Excludes loans by associations in Utah which were made in other States.

3/ 1942 loans included are amounts approved rather than amounts outstanding. Includes drought relief loans. 4/ County data represent rural rehabilitation loans to individuals not on projects, including those from State Corporation trust funds, and water facility loans. They also include special real estate loans totaling \$6,087. 5/ Indicates number of borrowers rather than number of loans, as many borrowers have loans from both the Federal Land Bank and Land Bank Commissioner.

6/ Represents primarily loans to individuals not on projects which are not distributable by counties, but also includes \$45,303 of loans to individuals on projects including those from State Corporation trust funds.

1/ These data are not strictly comparable with those in table 2, which are classified by counties according to location of borrower or security. Data for any county with less than three banks on July 1, 1942 are not shown separately but are included with those for the county named in parentheses. Asterisks indicate that data for additional counties are included, the number of asterisks representing the number of additional counties. County combinations are the same for both types of loans.

2/ No insured commercial banks located in the county.

3/ In previous tabulations this county had no commercial banks.

4/ In previous tabulations these counties had more than two banks.

1/ These data are not strictly comparable with those in table 1, which are classified by counties according to location of bank.

2/ 1942 loans included are amounts approved rather than amounts outstanding. Includes drought-relief loans.

3/ County data represent rural rehabilitation loans to individuals not on projects, including those from State Corporation trust funds, and water facility loans. They also include special real estate loans totaling \$149,848.

4/ Indicates number of borrowers rather than number of loans, as many borrowers have loans from both the Federal Land Bank and Land Bank Commissioner.

5/ Represents rural rehabilitation loans to individuals on projects including project equipment loans. These are not distributable by counties.

1/ These data are not strictly comparable with those in table 1, which are classified by counties according to location of bank.

2/ *1942 loans included are amounts approved rather than amounts outstanding.

3/ County data represent rural rehabilitation loans to individuals not on projects, including special real estate loans totaling \$8,824.

4/ Indicates number of borrowers rather than number of loans, as many borrowers have loans from both the Federal Land Bank and Land Bank Commissioner.

5/ Represents rural rehabilitation loans to individuals on projects. These are not distributable by counties.

AGRICULTURAL LOANS IN SOUTH DAKOTA

This report presents data on agricultural loans held by selected lending agencies on July 1, 1942, by counties. (A more detailed report covering earlier periods is available.)

Washington, D. C.
January 1943

Un 38a
no. 34
1942

[illegible]

1/ These data are not strictly comparable with those in table 2 which are classified by counties according to location of borrower or security. Data for any county with less than three banks on July 1, 1942 are not shown separately but are included with those for the county named in parentheses. Asterisks indicate that data for additional counties are included, the number of asterisks representing the number of additional counties. County combinations are the same for both types of loans.

2/ No insured commercial banks located in the county.

1/ These data are not strictly comparable with those in table 1, which are classified by counties according to location of bank.

2/ Excludes loans by associations in South Dakota which were made in other States.

3/ 1942 loans included are amounts approved rather than amounts outstanding.

Includes drought-relief loans.

4/ County data represent rural rehabilitation loans to individuals not on projects, including those from State Corporation trust funds, and water facility loans.

5/ Indicates number of borrowers rather than number of loans as many borrowers have loans from both the Federal Land Bank and Land Bank Commissioner.

6/ Represents rural rehabilitation loans to individuals on projects. These are not distributable by counties.

^{1/} These data are not strictly comparable with those in table 2, which are classified by counties according to location of borrower or security. Data for any county with less than three banks on July 1, 1942 are not shown separately but are included with those for the county named in parentheses. Asterisks indicate that data for additional counties are included, the number of asterisks representing the number of additional counties. County combinations are the same for both types of loans.

^{2/} No insured commercial banks located in the county.

1/ These data are not strictly comparable with those in table 1, which are classified by counties according to location of bank.

2/ Includes loans made in Oregon by associations located in other States, and excludes loans made in other States by Oregon associations.

3/ 1942 loans included are amounts approved rather than amounts outstanding. Includes drought relief loans.

4/ County data represent rural rehabilitation loans to individuals not on projects, including those from State Corporation trust funds, and water facility loans. Also includes special real estate loans totaling \$127,931.

5/ Indicates number of borrowers rather than number of loans, as many borrowers have loans from both the Federal Land Bank and Land Bank Commissioner.

6/ Represents rural rehabilitation loans to individuals on projects, including those from State Corporation trust funds. Also includes loans to individuals not on projects totaling \$14,353. These are not distributable by counties.

1/ These data are not strictly comparable with those in table 2, which are classified by counties according to location of borrower or security. Data for any county with less than three banks on July 1, 1942 are not shown separately but are included with those for the county named in parentheses. Asterisks indicate that data for additional counties are included, the number of asterisks representing the number of additional counties. County combinations are the same for both types of loans.

1/ These data are not strictly comparable with those in table 1, which are classified by counties according to location of bank.

2/ 1942 loans included are amounts approved rather than amounts outstanding.

3/ County data represent rural rehabilitation loans to individuals not on projects, including those from State Corporation trust funds. They also include special real estate loans totaling \$31,038.

4/ Indicates number of borrowers rather than number of loans, as many borrowers have loans from both the Federal Land Bank and Land Bank Commissioner.

5/ Represents rural rehabilitation loans to individuals on projects, including those from State Corporation trust funds, and project equipment loans. These are not distributable by counties.

^{1/} These data are not strictly comparable with those in table 1, which are classified by counties according to location of bank.

^{2/} Includes loans made in North Dakota by associations located in other States.

^{3/} Includes drought relief loans.

^{4/} County data represent rural rehabilitation loans to individuals not on projects including those from State Corporation trust funds, and water facility loans.

^{5/} Indicates number of borrowers rather than number of loans, as many borrowers have loans from both the Federal Land Bank and Land Bank Commissioner.

^{6/} Represents rural rehabilitation loans to individuals on projects. These are not distributable by counties.

1/ These data are not strictly comparable with those in table 2, which are classified by counties according to location of borrowers or security. Data for any county having less than three banks on July 1, 1942 are not shown separately but are included with those for the county named in parentheses. Asterisks indicate that data for additional counties are included, the number of asterisks representing the number of additional counties. County combinations are the same for both types of loans.

1/ These data are not strictly comparable with those in table 1, which are classified by counties according to location of bank.

2/ Includes loans made in New York by associations located in other States.

3/ Includes drought relief loans.

4/ County data represent rural rehabilitation loans to individuals not on projects, including those from State Corporation trust funds. They also include \$5,696 of special real estate loans.

5/ Indicates number of borrowers rather than number of loans, as many borrowers have loans from both the Federal Land Bank and Land Bank Commissioner.

6/ Represents rural rehabilitation loans to individuals on projects, and \$60,390 of loans to individuals not on projects. These are not distributable by counties.

State total	1,863,852	93,290	1,489,865	9,044,625	4,894,612	4,224

1/ These data are not strictly comparable with those in table 1, which are classified by counties according to location of bank.

2/ County data represent rural rehabilitation loans to individuals not on projects, including those from State Corporation trust funds. They also include special real estate loans totaling \$8,078.

3/ Indicates number of borrowers rather than number of loans, as many borrowers have loans from both the Federal Land Bank and Land Bank Commissioner.

4/ Represents rural rehabilitation loans to individuals not on projects, which are not distributable by counties.

1/ These data are not strictly comperable with those in table 1, which are classified by counties according to location of bank.

2/ Includes loans made in Nebraska by associations located in other States and excludes loans by associations in Nebraska which were made in other States.

3/ 1942 loans included are amounts approved rather than amounts outstanding. Includes drought-relief loans.

4/ County data represent rural rehabilitation loans to individuals not on projects, including those from State Corporation trust funds, and water facility loans.

5/ Indicates number of borrowers rather than number of loans, as many borrowers have loans from both the Federal Land Bank and Land Bank Commissioner.

6/ Represents rural rehabilitation loans to individuals on projects. These are not distributable by counties.

1/ These data are not strictly comparable with those in table 2, which are classified by counties according to location of borrower or security. Data for any county with less than three banks on July 1, 1942 are not shown separately but are included with those for the county named in parentheses. Asterisks indicate that data for additional counties are included, the number of asterisks representing the number of additional counties. County combinations are the same for both types of loans.

2/ No insured commercial banks located in the county.

3/ In previous tabulations this county had more than two insured commercial banks.

1/ These data are not strictly comparable with those in table 1, which are classified by counties according to location of bank.

2/ Excludes loans made in other States by Missouri associations.

3/ Includes drought-relief loans.

4/ County data represent rural rehabilitation loans to individuals not on projects. Including those from State Corporation trust funds. They also include special real estate loans totaling \$182,840.

5/ Indicates number of borrowers rather than number of loans, as many borrowers have loans from both the Federal Land Bank and Land Bank Commissioner.

6/ Represents rural rehabilitation loans to individuals on projects, including those from State Corporation trust funds, and project equipment loans. These are not distributable by counties.

1/ These data are not strictly comparable with those in table 2, which are classified by counties according to location of borrower or security. Data for any county with less than three banks on July 1, 1942, are not shown separately, but are included with those for the county named in parentheses. Asterisks indicate that data for additional counties are included, the number of asterisks representing the number of additional counties. County combinations are the same for both types of loans.

2/ In previous tabulations this county had less than three commercial banks.

3/ No insured commercial banks located in the county.

1/ These data are not strictly comparable with those in table 1, which are classified by counties according to location of bank.

2/ 1942 loans included are amounts approved rather than amounts outstanding.

3/ County data represent rural rehabilitation loans to individuals not on projects, including those from State Corporation trust funds. They also include special real estate loans totaling \$23,295.

4/ Includes number of borrowers rather than number of loans, as many borrowers have loans from both the Federal Land Bank and Land Bank Commissioner.

5/ Represents rural rehabilitation loans to individuals on projects. These are not distributable by counties.

1/ These data are not strictly comparable with those in table 2, which are classified by counties according to location of borrower or security. Data for any county with less than three banks on July 1, 1942 are not shown separately but are included with those for the county named in parentheses. Asterisks indicate that data for additional counties are included; the number of asterisks representing the number of additional counties. County combinations are the same for both types of loans.

2/ In previous tabulations this county had more than two insured commercial banks.

- 1/ These data are not strictly comparable with those in table 1, which are classified by counties according to location of bank.
- 2/ Includes drought-relief loans.
- 3/ County data represent rural rehabilitation loans to individuals not on projects, including those from State Corporation trust funds. They also include special real estate loans totaling \$1,175,898.
- 4/ Indicates number of borrowers rather than number of loans, as many borrowers have loans from both the Federal Land Bank and Land Bank Commissioner.
- 5/ Represents rural rehabilitation loans to individuals on projects, including those from State Corporation trust funds, and project equipment loans. These are not distributable by counties.

1/ These data are not strictly comparable with those in table 2, which are classified by counties according to location of borrower or security. Data for any county with less than three banks on July 1, 1942 are not shown separately but are included with those for the county named in parentheses. Asterisks indicate that data for additional counties are included, the number of asterisks representing the number of additional counties. County combinations are the same for both types of loans.

2/ No insured commercial banks located in the county.

State total	1,925,500	1,194,200

1/ These data are not strictly comparable with those in table 2, which are classified by counties according to location of borrower or security. Data for any county with less than three banks on July 1, 1942 are not shown separately but are included with those for the county named in parentheses. Asterisks indicate that data for additional counties are included, the number of asterisks representing the number of additional counties. County combinations are the same for both types of loans.

Table 2.- Agricultural loans in Massachusetts held by various federally sponsored agencies on July 1, 1942, classified by counties according to location of borrower or security 1/

AGRICULTURAL LOANS IN KENTUCKY

Distribution for Selected Lending Agencies, by Counties

Washington, D. C.
January 1942

EXPLANATION

This is one of a series of publications designed to give material on agricultural loans in each of the 48 States. Requests have been received from many sources for data that would show, by counties, the extent to which farmers are indebted, the extent to which they are using credit in their operations, and the extent to which various agencies are supplying credit.

The data presented include virtually all that are now available on a county basis, and steps are being taken to obtain additional information for release at some later time. Certain data, available on a State but not a county basis, are included to provide a more complete picture of the farm-credit situation existing within the State than is revealed by the county data.

Figures on loans to farmers held by insured commercial banks were taken from supplementary reports submitted by the banks with their June 29, 1940 call report to the Federal Deposit Insurance Corporation, the Comptroller of the Currency, and the Board of Governors of the Federal Reserve System. County data were supplied also by the Farm Credit Administration and the Farm Security Administration.

County figures presented in this publication are not strictly comparable as between lender groups, and certain qualifications should be kept in mind when using them. Those for the Farm Security Administration and agencies of the Farm Credit Administration are classified according to the location of the security or the borrower and therefore represent loans to farmers only in the county named, whereas those for insured commercial banks are classified according to the location of the bank and thus may represent loans to farmers in one or more counties. Particularly in the case of banks located in the larger cities, figures may include agricultural paper purchased from, or rediscounted for, banks located in other counties or outside the State.

Information on agricultural loans held by insured commercial banks is not shown separately for any county with less than three banks on July 1, 1940 or January 1, 1941, but is combined with that for one or more other counties as noted in the county tables.

Farm real estate loans reported by insured commercial banks and the Farm Security Administration represent the unpaid balance, whereas those reported by the Farm Credit Administration represent the original face amount of the loans.

APR 28 1944

UNIVERSITY OF ILLINOIS

FARM REAL ESTATE LOANS

Loans secured by mortgages on farm real estate in Kentucky on January 1, 1940 are estimated to total \$105,729,000 (table 1). This is about three-fourths of the total at the beginning of the peak year 1921. Farm-mortgage debt in this State has been increasing again since 1938.

The Federal Land Bank of Louisville and the Land Bank Commissioner together held 45 percent of the total farm-mortgage debt in Kentucky on January 1, 1940. At the peak of their holdings in 1936 they accounted for 56 percent, and ever since 1924 the Federal Land Bank has held 20 percent or more. Of the \$47,334,000 of loans in this State held by these two agencies on January 1, 1940, \$33,875,000 were loans of the Federal Land Bank. By the end of 1940 their total loans had been reduced to \$44,002,000.

During 1940 the Federal Land Bank of Louisville made 310 loans in Kentucky totaling \$917,000. Of this amount, 77 percent was used for refinancing indebtedness, 14 percent for purchasing land or redeeming land from foreclosure, 3 percent for general agricultural purposes, including buildings and improvements, and 6 percent for national farm loan association stock and fees. Of the amount used for refinancing indebtedness, 77 percent was for refinancing farm real estate mortgages. The Land Bank Commissioner closed 457 loans amounting to \$726,700, the proceeds of which were used for purposes similar to those indicated for the Federal Land Bank. But a larger proportion was used for general agricultural purposes, and no funds were used for purchasing stock. Also a smaller part of the funds used for refinancing indebtedness was used for refinancing farm mortgages. It is estimated that 532 borrowers were accommodated with loans from these two agencies during 1940, many obtaining loans from both the Federal Land Bank and the Land Bank Commissioner.

Individuals have been an important source of loan funds in Kentucky, particularly before 1925. Although less important now, they are still one of the leading sources of farm-mortgage credit. Insured commercial banks in Kentucky on January 1, 1940 held farm real estate loans totaling \$22,535,000. By the end of 1940 their mortgage holdings had increased to \$24,054,000, continuing an expansion that has been evident since 1936. Life insurance company loans in this State have been increasing again during the last few years and at the beginning of 1940 totaled \$13,494,000. But this is only about half the amount of their outstanding loans during the years 1926-30. On January 1, 1940 they held only about 13 percent of the total farm-mortgage debt as compared with 20 percent or more during the period 1925-34. The joint stock land banks at the beginning of 1940 held only \$302,000 of loans in Kentucky, and these were further reduced to \$132,000 by the end of that year. During the years 1924-31 their loans amounted to about \$11,000,000, or approximately 10 percent of the total debt. Since 1933 these banks have been in the process of liquidation.

The Farm Security Administration on January 1, 1940 had tenant-purchase loans outstanding in Kentucky amounting to \$1,177,000, and by

^{1/} As of January 1.

^{2/} As of January 1. Average contract rates, except on loans of Federal Land Bank, 1935 and 1940, and Land Bank Commissioner, 1940, which are included at temporarily reduced rates. Rates for lenders other than the Federal Land Bank and Land Bank Commissioner in 1940 are assumed to be the same as those in effect on January 1, 1936, no later data being available.

^{3/} Payable during calendar year. Excludes amounts paid by Secretary of the Treasury to Federal Land Bank, 1935 and 1939, and Land Bank Commissioner, 1939, as reimbursement for interest reductions granted borrowers.

January 1, 1941 these loans had increased to \$1,963,000. This organization also made loans in this State for the construction of farmstead improvements, of which \$224,000 and \$222,000 were outstanding on those dates, respectively.

A group of miscellaneous lenders, in addition to those mentioned, also held mortgages on farm real estate in Kentucky.

SHORT-TERM LOANS TO FARMERS

On January 1, 1941 short-term loans to farmers in Kentucky, other than those secured by farm real estate, held by insured commercial banks and various federally sponsored agencies totaled \$26,462,000. Information is not available concerning the short-term credit extended by private individuals, merchants and dealers, marketing agencies, and cooperative organizations.

Personal and collateral loans held by insured commercial banks in Kentucky on January 1, 1941 amounted to \$17,262,000 (table 2). This amount is the largest outstanding at any time since January 1, 1935, although it is probably less than that outstanding in years prior to that time.

Personal and collateral loans held by insured commercial banks in Kentucky on January 1, 1935 and July 1, 1940 are classified by type of security in table 3. In both years, the largest amount of loans was unsecured. Only small amounts of loans were secured by livestock only; crops, equipment, and livestock; warehouse receipts; and other collateral. The net decrease between 1935 and 1940 is accounted for largely by the decrease in unsecured loans. Loans outstanding on livestock only; on crops, equipment, and livestock; and on warehouse receipts increased between 1935 and 1940. Although short-term loans held by banks in Kentucky tend to be seasonally higher on July 1 than on January 1, other factors also account for the net change between 1935 and 1940.

Rural rehabilitation loans held by the Farm Security Administration totaled \$4,075,000 in Kentucky on January 1, 1941, the largest amount outstanding at any time during Farm Security Administration activity. State figures are not available before 1938 (table 2).

Total loans held by Kentucky production credit associations amounted to \$3,924,000 on January 1, 1941, all of which were outstanding in Kentucky (table 2). Loans outstanding at the beginning of 1941 were higher than at any other time since the establishment of the production credit system, with the exception of July 1, 1940. Kentucky production credit associations made 7,101 loans totaling \$5,529,000 during 1940, all of which were made in the State.

Crop and feed loans held by the Emergency Crop and Feed Loan Office at St. Louis, Mo. totaled \$1,157,000 in Kentucky on January 1, 1941. This amount is lower than that outstanding in previous years. During 1940, 3,946 crop and feed loans totaling \$218,000 were made in Kentucky. No drought relief loans were made in Kentucky during 1934-35.

Total loans	181,569	100.0	215,359	100.0	33,790	18.6

Loans to and discounts for private financing institutions by the Federal Intermediate Credit Bank of Louisville have been relatively small in Kentucky and only \$44,000 were outstanding on January 1, 1941. Regional agricultural credit corporation loans are in process of liquidation, and those held in Kentucky by the Regional Agricultural Credit Corporation of Washington, D. C. ^{1/} amounted to less than \$500 on January 1, 1941.

Loans made in Kentucky by the Commodity Credit Corporation, including both those loans made directly by the Commodity Credit Corporation and those guaranteed by the Corporation but made by banks and other lending agencies, totaled \$946,000 during the year ending January 1, 1941; however, figures on the amount of loans outstanding on that date are not available. From the date of organization in October 1933 to January 1, 1941, total loans have amounted to \$4,423,000, most of which were on tobacco. It should be noted that these figures do not include any 1939 dark tobacco purchases, 1939 and 1940 flue-cured tobacco purchases, or 1940 flue-cured tobacco loans, all of which are unallocable by States.

LOANS TO FARMERS' COOPERATIVE ORGANIZATIONS

On January 1, 1941, outstanding loans to farmers' cooperative organizations in Kentucky from the banks for cooperatives totaled \$217,000. No loans to cooperatives in the State were held by the Farm Security Administration. From the date of its organization in May 1935 to January 1, 1941, the Rural Electrification Administration has advanced \$7,603,000 to electrification cooperatives and \$70,000 to private utility companies for rural electrification purposes in Kentucky, nearly all of which is outstanding.

Credit also has been extended to farmers' cooperatives through loans by commercial banks, private individuals, and other cooperatives, and through purchases on credit from wholesalers and dealers.

INTEREST RATES AND CHARGES

Interest rates on outstanding farm-mortgage loans in Kentucky fluctuated within a narrow range during the years 1910-33, averaging between 5.8 and 6.0 percent. (See table 1 for rates in selected years.) But after 1933 the all-lender average declined noticeably, falling to 4.7 percent in 1938 and equaling 4.8 percent in 1939 and 1940. This decline in recent years resulted largely from a lowering of the rates charged by the Federal Land Bank and Land Bank Commissioner as well as an increase in the proportion of the total farm-mortgage debt held by these two agencies. Even before the low rates of recent years were made effective, these two agencies were loaning at rates lower than those charged by other lender groups. On January 1, 1940 the temporarily reduced rates of the Federal Land Bank and

^{1/} The Regional Agricultural Credit Corporation of Washington, D. C. acquired all assets and assumed all liabilities of the Regional Agricultural Credit Corporation of Columbus, Ohio, on September 30, 1937.

Land Bank Commissioner were 3.5 and 4.0 percent respectively, and since July 1, 1940, the latter agency also has charged 3.5 percent. The difference between the reduced rates and the contract rates is paid from the United States Treasury. Authority for the reduction in the effective rate to be paid by the borrower extends to June 30, 1942.

The average of rates charged in Kentucky by private lender groups reflects the influence of the maximum-interest-rate law in force in this State. The rates charged by individuals, banks, and a group of miscellaneous lenders remained within a narrow range, their average fluctuating between 5.9 and 6.1 percent. Life insurance companies were the only private lender group charging lower rates, their rates usually averaging between 5.6 and 5.8 percent. The joint stock land banks charged their usual rate of 6.0 percent. Data for lenders other than the Federal agencies are not available for years subsequent to 1936, but it is possible that their rates also may have declined.

Interest rates on short-term agricultural loans in Kentucky differ as between lenders. No current data for rates charged by commercial banks are available, but it seems probable that some reduction has taken place since 1936, at which time the interest rate most commonly charged by country banks that were members of the Federal Reserve System was 6.0 percent. Farm Security Administration rural rehabilitation loans have remained at 5.0 percent since their inception. On January 1, 1941, the interest rate on production credit association loans was 4.5 percent; on emergency crop and feed loans, 4.0 percent; and on regional agricultural credit corporation loans, 5.5 percent (table 4). Since 1934, the maximum rate which could have been charged by private financing agencies on loans discounted with the Federal Intermediate Credit Bank has been the same as that charged by the production credit associations.

Owners of mortgaged farms in Kentucky were under contract to pay about \$5,000,000 in farm-mortgage interest charges during 1939 (table 1). This is only 60 percent of the amount payable in 1921 when these payments were at their peak in Kentucky. The largest part of these payments during recent years was owed to the Federal agencies and individuals.

Interest charges on short-term agricultural loans in Kentucky held by insured commercial banks, agencies supervised by the Farm Credit Administration, and the Farm Security Administration approximated \$1,100,000 in 1939, 70 percent of which was payable on personal and collateral loans held by insured commercial banks. No definite figures are available on the interest charges payable on short-term credit extended by individuals, merchants and dealers, cooperatives, and others.

Table 4.- Interest rates charged on short-term loans in Kentucky by lending agencies now under the supervision of the Farm Credit Administration, 1934-41

1/ Discount rate on loans and discounts for private financing institutions. The maximum interest rate which could have been charged farmer-borrowers on these loans was 3 percent higher than the rate charged private financing institutions by the Federal Intermediate Credit Bank. This spread has been allowed since April 1931.

2/ No new loans being made.

3/ On crop and feed loans only; no drought relief loans made in Kentucky.

CASH FARM INCOME

Cash income received by farmers in Kentucky during 1940 from the marketing of agricultural products totaled \$145,898,000 (excluding Government payments). Although this is greater than the amount received in 1939, it is less than the total in both 1937 and 1938. Also it is only 80 percent of the cash farm income in 1929, but is about 80 percent greater than the 1932 total. Government payments to farmers in Kentucky during 1940 totaled \$13,318,000. Except for 1935, this is the largest amount paid out in any year since these payments were first made in 1933.

Approximately one-half of the total cash farm income from marketings in 1940 was derived from crops, and the remainder from livestock and livestock products. Tobacco accounted for about 70 percent of the income from crops, and grains - chiefly corn and wheat - for nearly 10 percent. Income

from the sale of meat animals represented a little more than 55 percent of the total from livestock and livestock products, and that from dairy products nearly 25 percent.

FARM LAND VALUES AND TRANSFERS

Farm real estate values in Kentucky have risen continuously since their low point in 1933, and on March 1, 1941 they were 114 percent of their 1912-14 level as compared with 80 percent in 1933 and 200 percent in 1920. Reports of the Bureau of the Census indicate that the value of farm real estate in Kentucky in early 1940 averaged approximately \$38 per acre. In some respects the trend of farm real estate values was similar to that of farm-mortgage debt, but the total value of farm land and buildings in Kentucky in 1940 was only about one-fifth greater than in 1910, whereas farm-mortgage debt was approximately three times greater.

The voluntary transfer of farm real estate often results in debt increases, whereas forced transfers usually bring about decreases. From 1926 (earliest date for which data are available) to 1932 voluntary transfers of farm real estate in Kentucky declined, except for a rise in the year ending March 15, 1930. By the end of that period they numbered 19.0 per 1000 of all farms as compared with 35.3 per 1000 in 1926. The volume changed little during 1933 and 1934, but a substantial rise during the next few years brought the number to 37.5 per 1000 in the year ending March 15, 1937. Another decline occurred in 1938, but for the years ending March 15, 1939 and 1940, voluntary transfers were about the same as in 1937.

Forced transfers (tax sales, foreclosures, bankruptcies, assignments to creditors, etc.) in Kentucky increased during the 2 years ending March 15, 1928, declined noticeably during the following year, and then rose to a peak of 48.0 per 1000 of all farms in the year ending March 15, 1933. Thereafter they fell considerably and for the 3 years ending March 15, 1940 annually numbered about 10 per 1000 of all farms.

The book value of farm real estate in Kentucky held by lending agencies (excluding individuals and miscellaneous lenders) totaled approximately \$4,000,000 on January 1, 1940. This amount compares with about \$6,600,000 in 1935, the earliest year for which complete figures are available. Nearly 80 percent of the farm real estate in this State held by lending agencies at the beginning of 1940 was owned by life insurance companies. Real estate holdings of these institutions, however, include farms sold under contract of sale and, therefore, are not strictly comparable with those of other lenders. Insured commercial banks held about 15 percent of the total, but the book value of farms held by the Federal Land Bank, the Federal Farm Mortgage Corporation, and joint stock land banks was relatively small.

DEBT ADJUSTMENT

Farm-debt adjustment has been of some importance in Kentucky. Reports of the Farm Security Administration show that between September 1, 1935 and the end of 1940, 3,600 cases were considered by the various county committees. Of these, some 1,600 were adjusted by reductions in debt or interest rates, extensions, or some other method. Indebtedness totaling \$6,091,000 was reduced on an average of approximately 18 percent.

LOANS OUTSTANDING, BY COUNTIES

Farm Real Estate Loans

Table 5 sets forth the farm-mortgage holdings of insured commercial banks by counties on July 1, 1940 and January 1, 1941. With respect to the loans of these banks, it should be noted that they are distributed on the basis of the location of the bank rather than the location of the real estate security. But it is likely that most of the loans were made within the county in which the banks are located and that such overlapping as exists tends to be offset as between counties. Some indication of the change in the amount of farm mortgages held by insured commercial banks between January 1, 1935 and July 1, 1940 is apparent in table 6.

County figures for the Federal Land Bank and Land Bank Commissioner shown in table 7 represent the face amount of outstanding loans rather than the unpaid principal, the latter figure not being available by counties. Some indication of the difference between these two sets of figures can be obtained by comparing the State totals for these two agencies on January 1, 1940, shown in table 7, with the unpaid principal amount on that date as set forth in table 1. Figures showing the estimated number of borrowers rather than the number of loans are presented, as many borrowers obtained loans from both the Federal Land Bank and the Land Bank Commissioner.

Table 7 also presents figures on the amount of tenant-purchase loans from the Farm Security Administration outstanding in each Kentucky county. These loans are made only in selected counties, depending on the prevalence of tenancy. This organization also has made loans in this State for other purposes, as indicated in the footnote.

Short-Term Loans to Farmers

Personal and collateral loans to farmers held by insured commercial banks in Kentucky on July 1, 1940 and January 1, 1941 are classified by counties according to location of the bank in table 5, and those held on January 1, 1935 and July 1, 1940 are shown by type of security, classified by counties according to location of the bank, in table 6. In the case of

certain counties for which information could not be shown without revealing data for individual banks, figures have been included with those for one or more other counties.

Short-term loans to farmers in Kentucky held by production credit associations, the Emergency Crop and Feed Loan Office, and Farm Security Administration on July 1, 1940 and January 1, 1941 are classified by counties according to location of borrower or collateral in table 8. In this table it should be noted that figures for Farm Security Administration do not include loans from funds of the State Rural Rehabilitation Corporation.

Significant differences are found among counties in Kentucky both in the total amount of short-term credit outstanding to farmers and in the amounts held by various credit agencies. But in using the data in tables 5 and 8, it should be kept in mind that personal and collateral loans of insured commercial banks are not strictly comparable with short-term loans for the various federally sponsored agencies. Loans of insured commercial banks are distributed on the basis of location of bank and may thus represent loans to farmers in one or more counties, whereas those for the federally sponsored agencies are classified according to location of borrower or the security and therefore represent loans to farmers only in the county named. In the case of the larger banks and those located near the county or State boundary, figures may include agricultural loans made directly to producers located in other counties or outside the State, or rediscounted for banks in those areas.

^{1/} These data are not strictly comparable with those in tables 7 and 8, which are classified by counties according to location of security or borrower. Data for any county with less than three banks on July 1, 1940 or January 1, 1941 are not shown separately but are included with those for the county named in parentheses. Asterisks indicate that data for additional counties are included, the number of asterisks representing the number of additional counties. County combinations are the same for both types of loans on both dates.

^{2/} No insured commercial banks located in the county.

^{3/} Revised.

These data are not strictly comparable with those in tables 7 and 8 which are classified according to location of security or borrower. Data for any county with less than three banks on July 1, 1940 are not shown separately but are included with those for the county named in parentheses. Asterisks indicate that data for additional counties are included, the number of asterisks representing the number of additional counties. County combinations are the same for all types of security on both dates.

1/ Less than \$500.
2/ No insured commercial banks located in the county.

1/ These data are not strictly comparable with those in tables 5 and 6, which are classified by counties according to location of bank.

2/ Face amount represents original amount of loan and not unpaid principal.

3/ Indicates number of borrowers rather than number of loans, as many borrowers have loans from both the Federal Land Bank and Land Bank Commissioner.

4/ Tenant-purchase loans. Excludes loans for construction of farmstead improvements totaling \$224,000 on July 1, 1940 and \$222,000 on January 1, 1941.

Table 8.- Short-term loans to farmers in Kentucky held by various federally sponsored agencies on July 1, 1940 and January 1, 1941, classified by counties according to location of the borrower or collateral 1/

^{1/} These data are not strictly comparable with those in tables 5 and 6, which are classified by counties according to location of bank.

^{2/} County data for July 1, 1940 are obtained by distributing the actual State total on the basis of loans made during 1940.

^{3/} Crop and feed loans only; no drought-relief loans made in Kentucky. County data for July 1, 1940 are obtained by distributing the actual State total on the basis of loans outstanding by counties on January 1, 1940 and loans made by counties during 1940.

^{4/} Rural rehabilitation loans to individuals located both on and off projects.

^{5/} Revised.

^{6/} Differs from State total in table 2. Excludes rural rehabilitation loans from funds of the State Rural Rehabilitation Corporation totaling \$189,079 on July 1, 1940 and \$181,309 on January 1, 1941.

1/ These data are not strictly comparable with those in table 2, which are classified according to location of borrower or security. Data for any county with less than three banks on July 1, 1942 are not shown separately but are included with those for the county named in parentheses. Asterisks indicate that data for additional counties are included, the number of asterisks representing the number of additional counties. County combinations are the same for both types of loans.

2/ In previous tabulations this county had less than three insured commercial banks.

3/ No insured commercial banks located in the county.

1/ These data are not strictly comparable with those in table 1, which are classified by counties according to location of bank.

2/ 1942 loans included are amounts approved rather than amounts outstanding. Includes drought-relief loans.

3/ County data represent rural rehabilitation loans to individuals not on projects, including those from State Corporation trust funds, and water facility loans.

4/ Indicates number of borrowers rather than number of loans, as many borrowers have loans from both the Federal Land Bank and Land Bank Commissioner.

5/ Represents rural rehabilitation loans to individuals on projects. These are not distributable by counties.

1/ These data are not strictly comparable with those in table 1, which are classified by counties according to location of bank.

2/ County data represent rural rehabilitation loans to individuals not on projects, including those from State Corporation trust funds. They also include special real estate loans totaling \$57,892.

3/ Indicates number of borrowers rather than number of loans, as many borrowers have loans from both the Federal Land Bank and Land Bank Commissioner.

4/ Represents rural rehabilitation loans to individuals on projects, including those from State Corporation trust funds, and project equipment loans. These are not distributable by counties.

1/ These data are not strictly comparable with those in table 2, which are classified by counties according to location of borrower or security. Data for any county with less than 3 banks on July 1, 1942, are not shown separately but are included with those for the county named in parentheses. Asterisks indicate that data for additional counties are included, the number of asterisks representing the number of additional counties. County combinations are the same for both types of loans.

2/ In previous tabulations this county had more than 2 insured commercial banks.

1/ These data are not strictly comparable with those in table 1, which are classified by counties according to location of bank.

2/ Includes drought relief loans.

3/ County data represent rural rehabilitation loans to individuals not on projects, including those from State Corporation trust funds. They also include special real estate loans totaling \$42,481.

4/ Indicates number of borrowers rather than number of loans, as many borrowers have loans from both the Federal Land Bank and Land Bank Commissioner.

5/ Represents rural rehabilitation loans to individuals on projects. These are not distributable by counties.

1/ These data are not strictly comparable with those in table 2, which are classified by counties according to location of borrower or security. Data for any county with less than three banks on July 1, 1942 are not shown separately but are included with those for the county named in parentheses. Asterisks indicate that data for additional counties are included, the number of asterisks representing the number of additional counties. County combinations are the same for both types of loans. 2/ No insured commercial banks located in the county.

Washington	150,487	12,100	148,142	362,383	101,308	211
Undistributed			6/275,547			
State total	5,039,851	911,712	6,651,903	23,880,395	7,862,562	10,627

1/ These data are not strictly comparable with those in table 1, which are classified by counties according to location of bank.

2/ Includes loans made in Idaho by associations located in other States and excludes loans made in other States by associations in Idaho.

3/ 1942 loans are amounts approved rather than amounts outstanding. Includes drought relief loans.

4/ County data represent rural rehabilitation loans to individuals not on projects, including those from State Corporation trust funds, and water facility loans. They also include special real estate loans totaling \$56,773.

5/ Indicates number of borrowers rather than number of loans, as many borrowers have loans from both the Federal Land Bank and Land Bank Commissioner.

6/ Represents rural rehabilitation loans to individuals on projects, including those from State Corporation trust funds. Also includes \$5,960 of loans to individuals not on projects. These are not distributable by counties.

1/ These data are not strictly comparable with those in table 2, which are classified by counties according to location of borrower or security. Data for any county with less than three banks on July 1, 1942 are not shown separately but are included with those for the county named in parentheses. Asterisks indicate that data for additional counties are included, the number of asterisks representing the number of additional counties. County combinations are the same for both types of loans.

2/ No insured commercial banks located in the county.

3/ In previous tabulations no insured commercial banks located in this county.

1/ These data are not strictly comparable with those in table 1 which are classified by counties according to location of bank.

2/ 1942 loans included are amounts approved rather than amounts outstanding.

3/ County data represent rural rehabilitation loans to individuals not on projects, including those from State Corporation trust funds.

4/ Indicates number of borrowers rather than number of loans, as many borrowers have loans from both the Federal Land Bank and Land Bank Commissioner.

5/ Represents rural rehabilitation loans to individuals on projects, including project equipment loans. These are not distributable by counties.

^{1/} These data are not strictly comparable with those in table 2, which are classified by counties according to location of borrower or security. Data for any county with less than three banks on July 1, 1942 are not shown separately but are included with those for the county named in parentheses. Asterisks indicate that data for additional counties are included, the number of asterisks representing the number of additional counties. County combinations are the same for both types of loans.

^{2/} No insured commercial banks located in the county.

1/ These data are not strictly comparable with those in table 2, which are classified by counties according to location of borrower or security. Data for any county with less than three banks on July 1, 1942 are not shown separately but are included with those for the county named in parentheses. Asterisks indicate that data for additional counties are included, the number of asterisks representing the number of additional counties. County combinations are the same for both types of loans.

2/ No insured commercial banks located in the county.

1/ These data are not strictly comparable with those in table 1, which are classified by counties according to location of bank.

2/ Includes loans made in Arkansas by associations located in other States.

3/ 1942 loans included are amounts approved rather than amounts outstanding. Includes drought-relief loans.

4/ County data represent rural rehabilitation loans to individuals not on projects, including those from State Corporation trust funds. They also include special real estate loans totaling \$42,943.

5/ Indicates number of borrowers rather than number of loans, as many borrowers have loans from both the Federal Land Bank and the Land Bank Commissioner.

6/ Represents rural rehabilitation loans to individuals on projects and \$531 of loans to individuals not on projects. These are not distributable by counties.

1/ These data are not strictly comparable with those in table 2, which are classified by counties according to location of borrower or security. Data for any county with less than 3 banks are not shown separately but are included with those for the county named in parentheses. Asterisks indicate that data for additional counties are included, the number of asterisks representing the number of additional counties. County combinations are the same for both types of loans for specified dates.

2/ Data revised to include loans made by branch offices with counties where branches are located. These data were previously included with county in which the head office is located.

3/ No insured commercial banks located in the county.

Agricultural Loans, 1942, Table 1

1/ These data are not strictly comparable with those in table 1, which are classified by counties according to location of bank.

2/ Includes loans made in California by associations located in other States and excludes loans made in other States by associations in California.

3/ 1942 loans included are amounts approved rather than amounts outstanding. Includes drought relief loans.

4/ County data represent rural rehabilitation loans to individuals not on projects, including those from State Corporation trust funds, and water facility loans. They also include special real estate loans totaling \$17,429.

5/ Indicates number of borrowers rather than number of loans, as many borrowers have loans from both the Federal Land Bank and Land Bank Commissioner.

6/ Represents primarily loans to individuals not on projects which are not distributable by counties, but also includes \$17,461 of loans to individuals on projects, most of which were made from State Corporation trust funds.

Table 1.- Agricultural loans held by insured commercial banks in Colorado on July 1, 1942, classified by counties according to location of bank 1/

[illegible]

1/ These data are not strictly comparable with those in table 2, which are classified by counties according to location of borrower or security. Data for any county with less than three banks on July 1, 1942, are not shown separately but are included with those for the county named in parentheses. Asterisks indicate that data for additional counties are included, the number of asterisks representing the number of additional counties. County combinations are the same for both types of loans.

2/ No insured commercial banks located in the county.

1/ These data are not strictly comparable with those in table 1, which are classified by counties according to location of bank.

2/ Includes drought relief loans.

3/ Rural rehabilitation loans to individuals not on projects including those from State Corporation trust funds. Also includes water facility loans.

4/ Indicates number of borrowers rather than number of loans, as many borrowers have loans from both the Federal Land Bank and Land Bank Commissioner.

5/ Excludes loans made in other States by associations in Colorado.

6/ Represents amount of loans approved rather than amount disbursed.

7/ Includes rural rehabilitation loans to individuals on projects including those from State Corporation trust funds. Also includes project equipment loans, and an undistributed amount of loans to individuals not on projects totaling \$81,521.

These loans, however, are not included in county figures.
